

A COMMUNITY THAT WORKS FOR YOU

Everlasting improvements in a historic, scenic setting may seem impossible, but some developments are more determined on creating a community than focusing on their bottom line first and foremost.

Pedestrian friendly, amenity-rich and pluralistic plans are just some of the features that can make a community a desirable one.

Since 1987, Perth Homes Development has been making ongoing enhancements to make choosing one of their 20 different home plans (starting at 1,200 sq. ft.) an enjoyable experience, rather than a necessary chore.

Located in beautiful Perth, Ontario, the community which boasts amazing shops, restaurants and a great hospital, is set upon numerous nearby lakes and rivers which have garnered Perth the title of 'Prettiest Town in Ontario'.

A plethora of available lots all showcase the highly-desired Energy Star Efficient features, as well as a Tarion Warranty. All homes are covered by a one-year builder warranty and the seven-year Tarion Warranty Program. Not only does this make your home feel protected, it means insulation, air-tightness and indoor air quality are all paramount, reducing energy use and emissions which prevent long-term money loss.

With your home taken care of, residents are free to explore and enjoy their picturesque surroundings and local events such as the annual Stewart Park Music Festival located right in the middle of town.

If there was ever a development that focused on quality of life, safety and affordability, Perthmore Glen is a shining example.

The lifestyle you want is out there, and **Perth Homes** is waiting to offer it to you.
